" Il rivestimento 3D riporta sul gres porcellanato cubi di pietra o assi di legno su più livelli, capaci di creare diverse impressioni di profondità e ritmare le pareti con un piacevole effetto tridimensionale.
Frutto della sofisticata tecnologia "tile detector", che permette di fotografare e comunicare alla macchina digitale l'esatta scansione grafica che si desidera riprodurre, il rivestimento 3D vanta una sorprendente fedeltà mimetica e una resa materica tattile e d'impatto. Suggestiva per la zona living, originale per gli ambienti bagno e il giusto mix tra ricercatezza e innovazione per spazi pubblici quali spa o esercizi commerciali: il rivestimento 3D si adatta in modo versatile ad ogni stile, necessità e destinazione d'uso anche in esterno, grazie alle caratteristiche tecniche superiori del gres porcellanato. "

*The 3D wall covering features different levels of stone cubes or wooden planks on porcelain stoneware, creating different impressions of depth and re-create the walls with a pleasant three-dimensional effect. The result of the sophisticated "tile detector" technology, which allows photographing and communicating the exact graphic scan to be reproduced to the digital printer, the 3D wall covering boasts an amazing camouflage fidwelity and a tactile and impact material yield. Suggestive for the living area, original for the bathroom and the right mix of sophistication and innovation for public spaces such as spas or shops: the 3D wall covering adapts in a versatile way to any style, need and intended use even outdoors, thanks to the superior technical characteristics of porcelain stoneware.*

*Le revêtement de mur 3D comporte différents niveaux de cubes de pierre ou de planches de bois sur le grès de porcelaine, créant différentes impressions de profondeur et recréant les murs avec un effet tridimensionnel agréable. Le résultat de la technologie sophistiquée de «détecteur de carreaux», qui permet de photographier et de communiquer le scan graphique exact à reproduire à l'imprimante numérique, le revêtement mural 3D offre une incroyable fidélité de camouflage et un rendement tactile et matériel. Suggestif pour le salon, original pour la salle de bain et le bon mélange de sophistication et d'innovation pour les espaces publics tels que les spas ou les magasins: le revêtement mural 3D s'adapte de manière polyvalente à tout style, besoin et utilisation, même à l'extérieur, grâce au caractéristiques techniques supérieures du grès cérame.*

*Die 3D-Wandverkleidung weist auf das Feinsteinzeug verschiedene Ebenen von Steinwürfeln oder Holzbretter, die unterschiedliche Tiefeneindrücke erzeugen auf und die Wände mit einem angenehmen dreidimensionalen Effekt nachbilden. Das Ergebnis der hochentwickelten "tile-dektor" -Technologie, die es ermöglicht, den genauen grafischen Scan auf dem digitalen Drucker zu reproduzieren, zeichnet sich durch eine erstaunliche Tarnungstreue und einen taktilen und schlagzähen Materialertrag aus. Suggestiv für den Wohnbereich, originell für das Badezimmer und die richtige Mischung aus Raffinesse und Innovation für öffentliche Bereiche wie Wellness oder Shops: die 3D – Verblender passen sich dank der hervorragenden technische Eigenschaften von Feinsteinzeug jedem Stil, Bedarf und Verwendungszweck auch im Freien an.*
